Screen your dreams

You dream of empowering your brand,
we make it shine.

DOOH

Inspiring screens to engage your audience

Transform the way customers see your business. DOOH advertising displays allow brands to be seen, enhance their reputation, generate traffic at points of sale and stand out from the competition.

To gain engagement with your customers, you must offer excellent visibility, and dedication to customer success in order to secure confidence in your brand.

When it comes to digital signage displays, the strength of visualisation is to combine technical characteristics with aesthetic and marketing needs, creating realistic views of the results.

SCREEN YOUR SPACES

Screens and content come together to cause impact

Reach your audience at the right place and moment every time. INFiLED displays are the best canvas to promote, inform and inspire.

Commercial and corporate buildings

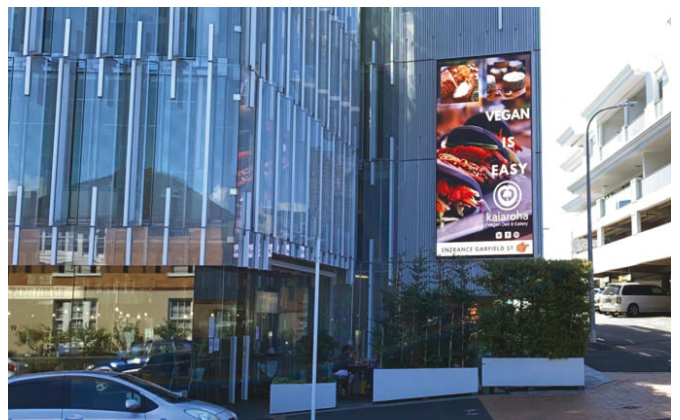

The first contact with your audience: workers, customers and visitors. Customised displays allow the communication of corporate or brand messages in a visually engaging way.

Airports and transport

In transport and high-traffic venues, DOOH displays provide interactive advertising for different brands, increasing engagement and revenue.

Travellers and passengers, can view diverse content delivered in a visually engaging format.

Retail & shopping

At retail stores and shopping centres, INFiLED's DOOH solutions highlight products and services to increase sales and build brand awareness.

Hospitality

Hotels, restaurants and spas seek to enhance their guests' stay. Large format screens offer a memorable experience.

Turn your outdoor space into an immersive experience

INFiLED displays are the best canvas to create inspiring immersive experiences for everyone.

Sporting venues

Sporting venues have been using displays for some time to show scores and capture great moments.

INFiLED's solutions provide new ways of using digital signage to build up fan engagement and excitement to offer better sporting experiences.

HUMAN CENTRIC SCREENS

Engage your customers

INFiLED creates technology for people through an entertaining visual experience, making your message stand out.

Immersive experiences

Out-of-home displays require more effective solutions that allow companies to create engaging experiences for their audiences; informing, entertaining and guiding guests and enhancing the customer experience.

High visual performance

All INFiLED solutions offer the highest performance in the visual reproduction of content and an extremely comfortable viewing experience, being the best medium for all your display content.

INFiLED screens are a reliable and robust choice under any light and weather conditions.

Flexibility

Screens with creative shapes and excellent colour accuracy create unique visual effects and provide an eye-catching experience for the audience.

Technology allows the development of tailor-made display solutions to suit all kinds of weather conditions and environments.

Sustainability

Aware of the need for sustainable development, INFILED works on more energy-efficient solutions.

Excellent thermal management of all the display's electronic components allows faster heat dissipation and saves energy, extending its service life.

CUSTOMIZED DISPLAY SOLUTIONS

If you can create it, you can display it

Boosting customer engagement and sales around the world with INFiLED's customised solutions, designed for diverse conditions and environments.

High visibility under any conditions

All INFiLED solutions offer excellent visual performance with a high refresh rate and extraordinary colour expression, even in the most challenging conditions.

Modular systems

Modular compositions can be adapted to the specific needs and formats of each display.

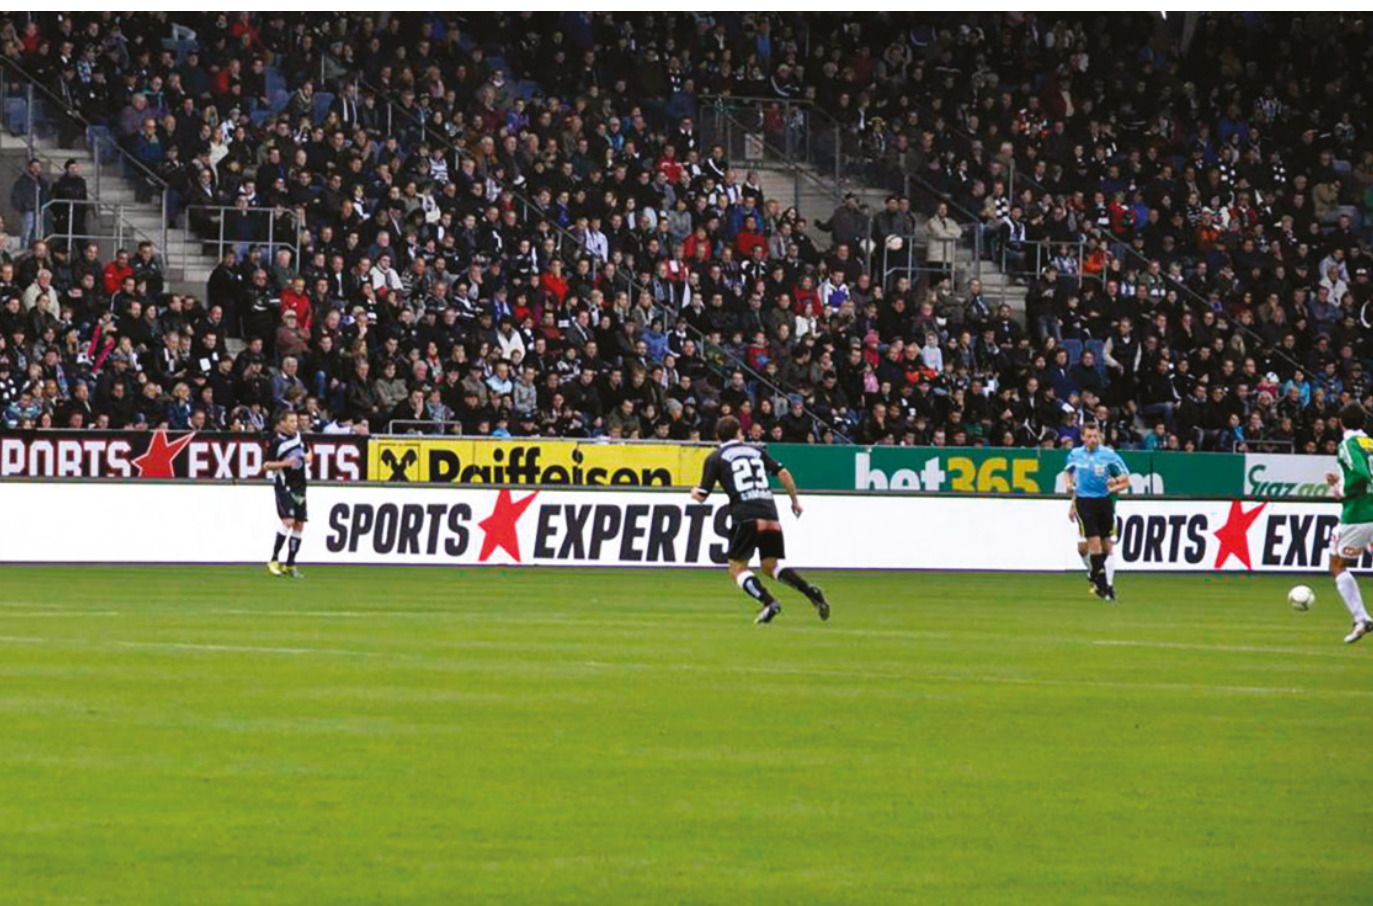

Thin & lightweight

Designed with an aluminium profile system frame that is much more durable than traditional magnesium panels.

Durability

Made resistant to perform in variable weather conditions and subjected to wet and corrosive elements. Front and rear IP65 waterproofing levels ensure smooth and reliable operation under variable and extreme weather conditions.

Smart solutions

The Global Display Monitoring System (DMS) allows remote live monitoring of the screen's key working conditions and functionality, from anywhere in the world.

Easy service access

Easy front and rear access for maintenance of any module.

Power consumption

Lower power consumption makes it ideal for energy saving in all day operating solutions, extending its lifespan.

NEW TECHNOLOGY INNOVATION

ColdLED

TECHNOLOGY

The result of years of dedicated research and development.

Featuring inverted LED packaging, increased luminous efficiency, an energyefficient IC driver, and meticulous power distribution design, ColdLED optimizes heat dissipation.

- Ensures premium quality while significantly reducing power consumption.
- Offers an immersive direct LED screen viewing and touch experience.
- Enhances LED thermal patterns to elevate picture quality and ensure a more dependable product lifespan.

SOLIDSKIN TECHNOLOGY

Enhanced screen durability.

With greater impact resistance and visual clarity, SolidSkin elevates the performance and reliability of the screens.

- This technology ensures stable performance across various environments.
- Improves the impact resistance of LED panels. The adhesive layer safeguards them against potential damage caused by vibrations or pressure.
- By applying GOB, the way light is emitted from the LEDs transitions from point light emission to area light emission. This transformation ensures consistent color representation and uniform brightness.

Showcase your world in infinite ways

Outstanding DOOH display solutions for a wide array of applications in all different areas and environments.

Lightweight yet robust, high-performance, LED solution for fixed indoor and outdoor installations.

The MV Series is a value-added solution suitable for a wide range of fixed advertising applications, including city squares, zones and transport hubs.

Featuring a slim and lightweight aluminium profile system frame, the MV Series offers

an ideal balance between weight and durability to withstand harsh environmental factors such as direct UV rays, varying temperatures, constant vibrations and severe weather conditions.

A reliable choice for DOOH providing exceptional and vivid image quality.

High brightness, high refresh rate and high contrast. Reliable under any weather conditions.

Indoor and outdoor installations

Pixel Pitch	Indoor: 2.9, 3.9, 5.9, 7.8mm Outdoor: 2.9, 3.9, 5.9, 6.9, 7.8, 10.4 with ColLED Technology, 12.5mm
Brightness	1.000 - 10.000nits
Cabinet size (WxHxD)	500x500, 500x1000, 1000x500, 1000x1000mm

MVmk2 SERIES

The MVmk2 series is an upgraded version of the MV series. This series is perfect for installation in a variety of indoor and outdoor spaces including squares, commercial districts, and transportation hubs.

The MVmk2 series features a state-of-the-art product design that utilizes lightweight aluminum profiles for the cabinet frame, making it easy to move around. It also has an IP65 rating, making it ideal for various outdoor environments.

The optical aspect of the MVmk2 series is impressive, with the ability to display brilliant and vivid images under any outdoor lighting conditions. It boasts an outstanding high brightness and contrast of up to 6000nits, ensuring the display quality.

A great energy-efficient display solution, with well-designed screens for various scenarios.

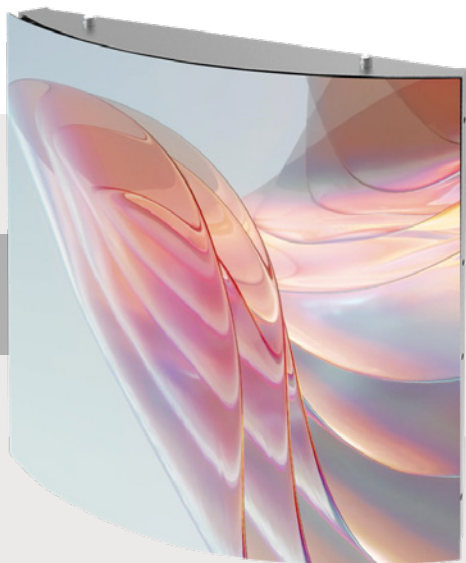

Outdoor applications

Pixel Pitch	3.9, 6.9, 10.4mm
Brightness	6000 - 10000nits
Cabinet size (WxHxD)	1000x1000x92 500x500x92

PRODUCT RANGE

MV EDGE SERIES

The MV EDGE series is a great solution for installations requiring smooth curves and comes as an addition to the standard MV series. It is designed for fixed outdoor convex curved applications.

Each module measures 125x250 mm, allowing it to form smooth curves while connected seamlessly to a larger flat MV LED display.

Pixel Pitch	3.9, 5.9, 7.8, 10.4mm
Brightness	5000nits
Cabinet size (WxHxD)	1000x1000x92mm

High brightness, high contrast ratio and high refresh rate guarantee clear and sharp images under any light conditions. With a low power consumption of just 180 W/m², the MV EDGE series is an energy-efficient and cost-saving solution. A reliable choice for DOOH which provides exceptional and expressive image quality with high brightness, refresh rate and contrast under any light condition.

Fixed convex curved LED display solution.
Indoor and outdoor applications

**MV MESH
SERIES**

MV Mesh series, as a particular version to the MV Series, is made to provide the outdoor fixed and rental LED screen solutions with transparency requirements. MV Mesh Series features high brightness, high contrast ratio and a high refresh rate, guarantee the output of clear images visible under any lighting conditions. The MV Mesh series is also eco-friendly with an average power consumption of 180w/m². The super-high transparency design gives it an 8kg lighter cabinet while compared with the MV Series.

High transparency, brightness & contrast
Outdoor applications

Pixel Pitch	10.4, 16, 1531, 2550mm
Brightness	5000 - 10000nits
Cabinet size (WxHxD)	1000x1000x92 500x500x92

SP SERIES

SP series conforms to the EN 55022-A class A standard, ensuring impeccable operational stability, even in the presence of external electric and electromagnetic interference. This also guarantees that our SP series won't disrupt other electrical equipment. Power and signal redundancy ensure faultless operation, making it an ideal display solution for sports events and outdoor applications, even in the event of component failure.

A great display solution for sports events and outdoor applications.

Pixel Pitch	6.25, 10mm
Brightness	5000 - 6000nits
Cabinet size (WxHxD)	1600x956x142mm

PRODUCT RANGE

OREZ SERIES

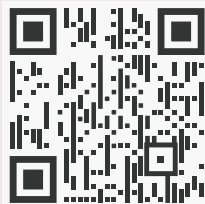

The OREZ is an energy-efficient small-pitch high contrast outdoor LED display. Equipped with high-performance black LEDs and a high contrast ratio of 26700:1, the OREZ is one of the best outdoor LED products in the market. Moreover, the OREZ is environmentally friendly with a maximum power consumption of only 210W per panel, using one-third less power compared with most outdoor display products.

A great energy-efficient display solution, with well-designed screens for various scenarios.

Outdoor applications

Pixel Pitch	2.6mm
Brightness	4500 - 5000nits
Cabinet size (WxHxD)	500x500x82

ART SERIES

More lightweight and stronger, the INFiLED All for Rental Touring series represents the next generation of LED display touring systems. Developed specifically to offer an all-in-one solution for rental and touring markets, the ART series is superbly lightweight and unprecedentedly robust due to the smart combination of carbon fibre and die-cast aluminium. With an innovative and removable ladder, the whole structure is strong and resistant to a wind speed of 20 m/s, the 8th grade on the Beaufort scale, coping with any harsh outdoor environment.

Strong and lightweight, all-in-one solution for rental and touring. Outdoor applications.

Pixel Pitch	3.9, 4.6, 5.9, 7.8, 10.4mm
Brightness	4000 - 5000nits
Cabinet size (WxHxD)	500x1000x131mm 500x500x131mm

AMmk2 SERIES

AMmk2 series is an innovative see-through LED display that can be adopted in various scenarios including music festivals, sports events, and concerts. This series has high transparency, a high contrast ratio, and sufficient brightness. It can present astonishing visual effects without obscuring scenery behind the display. With the protection mark of IP65, the AMmk2 series can

work stably in dusty or rainy weather. Besides, its cabinets are light, weighing only 10.5kg/m², which is convenient for moving and assembly; it also supports hoisting and stacking installation, to meet the requirement for integrated system solutions for different outdoor events.

A great display solution for live events, well-designed quality screens.

Outdoor applications.

Pixel Pitch	8.3mm
Brightness	3500 - 4000nits
Cabinet size (WxHxD)	1200x1200x54mm, 1200x600x55.4mm

PRODUCT RANGE

ARmk2 SERIES

The ARmk2 series is an exceptional high-performance product, expertly crafted for indoor and outdoor events such as exhibitions, XR/VP studios, touring, and carnivals. Its slim, lightweight cabinets facilitate easy front and rear maintenance, and installation while ensuring delightful visuals. This series boasts significant improvements over its last generation, including the flexibility to create

curved screens with 9 adjustable angles. For enhanced stability and easy mobility, it comes with a matched dolly and a robust bracket that can withstand strong winds of up to 20m/s, rendering it particularly suitable for outdoor use.

A great product for various applications, with reliable performance. Indoor and outdoor applications.

Pixel Pitch	Indoor: 2.9, 3.4, 3.9, 4.8 5.9, 6.9, 7.8mm Outdoor: 3.9, 4.6, 5.9, 7.8, 10.4mm
Brightness	4000 - 5000nits
Cabinet size (WxHxD)	500x1000x67mm, 500x500x67mm

RS SERIES

The RS series is an aesthetically appealing, lightweight LED display. It simplifies the frame structure through a weight-reducing design and weighs only 8.6kg per cabinet, meeting the need for easy transportation and quick installation in the LED display rental market. This series features wide viewing angles and excellent image quality; besides, its cabinet connection applies INFiLED's

patented quick-lock system, allowing installation to be completed in 5 seconds. Versatile and adaptable, the RS series is ideally suited for stages, studios, retail stores, arenas, airports and other spaces.

A reliable display solution offering easy installation and exceptional screen quality. Indoor and outdoor applications.

Pixel Pitch	Indoor: 2.5mm Outdoor: 3.9mm
Brightness	1200 - 5000nits
Cabinet size (WxHxD)	500x1000x82mm 500x500x82mm
